

Anti-SPESP1 antibody, rabbit polyclonal

73-065 100 μ 1

Validation: KO mouse

Storage: Shipped at 4° C and aliquot and store at -20° C

Reactivity: Mouse. Not tested in other species.

Applications:

1. Western blotting (1/500~1/1,000 dilution)

2. Immunofluorescence staining (1/100~1/500)

Immunogen: Synthetic peptide corresponding to mouse SPESP1, MYGSNVFPEGRTSD (311-325 amino acids), conjugated with KLH

Form: Whole rabbit antiserum added with 0.1% sodium azide.

Key words: SPESP1, Sperm equatorial segment protein 1, Acrosome reaction, Sperm, Fetilization,

Function: The disruption of *Spesp1* was shown to cause an aberrant distribution of various sperm proteins. SPESP1 is necessary to produce the fully 'fusion competent' sperm.

Molecular mass: 44,702 with 399 amino acids. N-Glycosylated. N-terminal signal peptide (1-19) is removed in mature protein.**Database Links:** <u>uniprot/Q9D5A0</u> Mouse SPESP1

Fujihara Y. et al. (2010) Sperm equatorial segment protein 1, SPESP1, is required for fully

fertile sperm in mouse. J Cell Sci. 123:1531-6. WB, IF. Free access.

Reference: This antibody was described and used in the following publication...

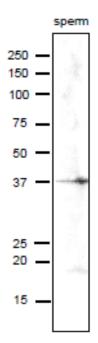

Fig. 1. Identification of SPESP1 protein in lysate of mouse sperm by western blotting with anti-SPESP1 antibody. Mouse sperm was lyzed in lysis buffer containing 1% Triton-X100 and extracts were prepared as supernatants of lysates after centrifugation. Proteins in the lysate were separated on SDS-PAGE (10~20% gradient gel) ,electro-blotted to PVDF membrane and reacted with anti-SPESP1 antibody at 1/1,000 dilution. As the second antibody, anti-rabbit IgG antibody conjugated with HRP (Abcam; ab97051) was used at 1/10,000

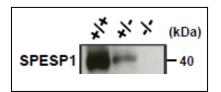

Fig.2 Dose dependent expression of SPESP1 protein in wild-type (+/+), here to allelic (+/-) and knock-out (-/-) mouse sperm..

Primary antibody was used at 1/500 dilution and 2nd antibody was at 1/10,000.

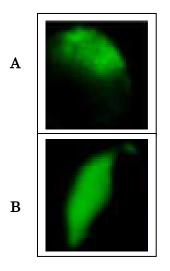

Fig.3. Immunofluorescence staining of mouse SPESP1 with anti-SPESP1 antibody.

- A. Round spermatid
- B. Epididymal sperm

As secondary antibody, Alexa Fluor 488 conjugated anti-rabbit IgG antibody was used.
