Anti Human Galectin 3 Polyclonal Antibody, Rabbit

The galectins are a family of carbohydrate-binding proteins that are distributed widely in metazoan organisms. Many galectin family members are detected primarily intracellularly in most of the systems studied, although certain members can be found both inside and outside of cells. Galectin-3 interacts with beta-galactoside residues of several cell surface and matrix glycoproteins through the carbohydrate recognition domain and is also capable of peptide-peptide associations mediated by its N-terminus domain. Recently, it has been demonstrated that galectin-3 is a new member of AGE-receptor complex. (Mol.Med.1:634-646,1995)

This antibody is affinity purified rabbit polyclonal antibody raised against recombinant human galectin-3 and should be used for western blotting.

Package Size	100 μ g (400 μ L / vial)
Format	Rabbit polyclonal antibody ,0.25mg/mL
Buffer	Block Ace as a stabilizer, containing 0.1% Proclin as a bacteriostat
Storage	Below -20°C until needed.
Purification method	This antibody was purified from rabbit serum by Protein G affinity chromatography.

Western blotting
Sample: Cell lysates of
Galectin-3 CHO or mock
CHO cells (10 μ g/lane)

Preparation of antibodies and instruction:
Prof. S Horiuchi,
Department of Biochemistry Kumamoto University
School of Medicine
