## Anti Human Chemokine-like factor 1 Polyclonal Antibody, Rabbit

Chemokine is a member of cytokines (interleukin, interferon etc.) and is known to activate chemokinesis of leukocytes. Chemokine-like factor 1 (CKLF1) is a novel chemokine and expressed on various types of tissue. It may play a role of chemokinetic induction on neutrophils, monocytes and lymphocytes. And CKLF1 is thought to be involved in reproduction of skeletal muscle cell.

The antibody was established from the purified serum immunized with partial peptide of human CKLF1. It is useful for immunohistochemical detection of CKLF 1.

|                     |  |
|---------------------|--|
| Package Size        | 25 $\mu$ g (100 $\mu$ L/vial)  |
| Format              | Rabbit polyclonal antibody 0.25mg/mL   |
| Buffer              | PBS [containing 50% Block Ace as a stabilizer, 0.1% Proclin as a bacteriostat] |
| Storage             | Below $-20^{\circ}\text{C}$  |
| Purification method | This antibody was purified from rabbit serum by affinity chromatography.       |
| Working dilution    | For Immunohistochemistry ; 1~10 $\mu$ g/mL                                     |

### Immunohistochemistry

Sample : biopsied muscle of a patient with multiple myositis

Preparation of antibodies and instruction :

Drs. Kobayashi S. and Nagai A. at Department of Internal Medicine III,  
Shimane Medical University
