Anti- Sugar chain (Clone : RGM22) [GalNAc α 1-3Gal β 1-R]

BACKGROUND

RGM22 is a mouse monoclonal antibody raised against the mucins purified from normal rat gastric mucosa, and recognizes mucin-type carbohydrate antigens containing a terminal GalNAc α 1-3Gal sequence. The RGM22 antigens are mainly expressed on normal g gastric mucosal cells (pyloric gland cells) in the gastrointestinal tract of mammalian. This antibody is a useful tool for elucidating the biological role of the specific sugar chain.
