

Acipimox

Description

Acipimox inhibits lipolysis in peripheral tissues and induces large reduction in circulating serum-free fatty acids. The mechanism of triglyceride lowering appears to be an increase of VLDL-Tg clearance.

Specifications

Cas No.	51037-30-0
Product ID	A0833
Product Name	Acipimox
Chemical Name	5-Methylpyrazinecarboxylic acid 4-oxide
Synonym	Neotigason; Soriatane
Formula Wt.	154.12
Melting Point	177°C-180°C
Purity	≥98%
Solubility	Water 20 mg/mL
Store Temp	Ambient
