Chlorpheniramine Maleate

Description

An antihistamine that has chemopreventive property. It inhibits carcinogen-induced aberrant crypt foci. Inhibits ornithine decarboxylase induction in experimental mammary tumors and in MCF-7 lines.

Specifications

Cas No.	113-92-8
Product ID	C2949
Product Name	Chlorpheniramine Maleate
Chemical Name	Psi-(4-Chlorophenyl)-N,N-dimethyl-2-pyridine- propanamine Maleate
Synonym	Allergisan; Anntagonate; Cloropiril; Histadur; Lorphen; Teldrin
Formula Wt.	390.87
Melting Point	130°C-135°C
Purity	≥98%
Solubility	Soluble in water and ethanol.
Store Temp	Ambient
