

25-Hydroxyvitamin D3

cat#H9815(LKT)

Description

The major circulating metabolite of vitamin D3 (Cholecalciferol). It is produced in the liver and is the best indicator of the body's vitamin D stores. It is effective in the treatment of rickets and osteomalacia, both in azotemic and non-azotemic patients. Calcifediol also has mineralizing properties.

Specifications

Cas No.	19356-17-3
Product ID	H9815
Product Name	25-Hydroxyvitamin D3
Formula Wt.	400.64
