

## Anti Retinoblastoma (RB) Protein (901-928) (Human) Serum

Cat. No. YII-Y280-EX      Lot No. 081171017

**Description:** This antiserum was raised in a rabbit by immunization with a porcine thyroglobulin (pTG) conjugate of synthetic RB protein (901-928) (human) fragment. The product vial contains 50 µL of the titled antiserum obtained by lyophilizing its 0.001 M phosphate buffer (pH 7.0, 0.5mL) solution. It can be used for immunoassay, immuno- histochemistry or any other immunoreaction with retinoblastoma protein (human).

**Immunogen:** Synthetic RB protein (901-928) (human)-pTG conjugate **Host:** Rabbit

**Amino Acid Sequence of RB Protein (901-928) (human)<sup>1)</sup>:**  
LAEMTSTRTRMQKQKMNMDMTSNKEEK

**Product Form:** Lyophilized unpurified serum **Size:** 50 µL

**Reconstitution:** Reconstitute the product with 0.5mL of 0.01M PBS (pH 7.0) to make a 10 fold diluted stock solution. If it is stored in a refrigerator, add moderate antiseptic to the solution (e.g. NaN<sub>3</sub> 0.1%).

**Storage:** The product will be stable for over one year if it be stored at -20°C to -80°C until opened. Upon recon- stitution, the antiserum solution must be stored at 2°C to 8°C and used within one month. Repeated freezing- thawing should be avoided.

**Suggested Working Dilution Range:** 1:1,500 (final dilution ~1:10,500) for radioimmunoassay<sup>2)</sup>; 1: 200- 1,000 for immunohistochemistry (frozen section). Optimal dilution should be determined by each laboratory for each application.

**Specificity** (based on radioimmunoassay): RB-protein (901-928) (human) 100%, detected a 105kDa protein in rat liver extract by gel filtration analysis.

**Positive Control** (immunohistochemistry): Rat intestines

**Species Tested:** Rat
