

Anti Nociceptin/Orphanin FQ Serum

Cat. No. YII-Y430-EX Lot No. 307111209

Description: This antiserum was raised in a rabbit by immunization with a carrier free synthetic Nociceptin/ Orphanin FQ peptide whose amino acid sequence is strictly conserved across mammalian species (bovine, mouse, rat, and human). The product vial contains 50 µL of the titled compound obtained by lyophilizing its 0.001 M phosphate buffer (pH 7.0, 0.5mL) solution. It can be used for immunoassay, immunohistochemistry or any other immunoreaction with Nociceptin/Orphanin FQ.

Immunogen: Synthetic Nociceptin/Orphanin FQ (human, rat), carrier free **Host:** Rabbit

Amino Acid Sequence of Nociceptin/Orphanin FQ (human, rat)¹⁾:
FGGFTGARKS ARKLANQ

Product Form: Lyophilized unpurified serum **Size:** 50 µL

Reconstitution: Reconstitute the product with 0.5mL of 0.01M PBS (pH7.0) to make a 10 fold diluted stock solution. If it is stored in a refrigerator, please add moderate antiseptic to the solution (e.g. 0.1% of NaN₃).

Storage: The product will be stable for over one year if it be stored at -20°C to -80°C until opened. Upon reconstitution, the antiserum solution must be stored at 2°C to 8°C and used within one month. Repeated freezing-thawing should be avoided.

Suggested Working Dilution Range: 1:1,500 (final dilution ~1:10,500) for radioimmunoassay; 1:500-1,000 for immunohistochemistry (frozen section). Optimal dilution should be determined by each laboratory for each application.

Specificity (based on radioimmunoassay): Nociceptin 100%, dynorphin A %, b-endorphin 0%

Positive Control (immunohistochemistry): Rat brain²⁾.
