Monoclonal Antibody to LSD1/AOF2

Cat. #: Mab-605126 (0.1mg)

Description:

The amine oxidase domain 2£"AOF2£©gene encodes a nuclear protein(LSD1,~95kDa) containing a Swirm domain, a FAD-binding motif, and an amine oxidase domain. This protein is a component of several histone deacetylase complexes, though it silences genes by functioning as a histone demethylase. LSD1 is a chromatin-modifying enzyme. which serve as a docking module for the stabilization of the associated corepressor complex(es) on chromatin.

Immunogen/Specificity:

Ni-NTA purified truncated recombinant human LSD1 expressed in E. Coli strain BL21 (DE3)

Applications:

Western Blot: 1: 500- 1: 2,000 IHC£"P£©: 1: 500- 1: 2.000 IHC£"F£©: 1: 500- 1: 2.000

ELISA: Propose dilution 1: 10,000.

Determining optimal working dilutions by titration

test.

Formulation

Crude Asites are purified by protein A affinity chromatography. References

Clone Number: 1B2E5

Isotype:

Species: Human

Storage and Stability: stored at -20 C
