Monoclonal mouse anti-lactoferrin

Catalogue # 4L2

Clone: 2B8
New clones: 1A1, 1C6

These clones have been derived from hybridization of Sp2/0 myeloma cells with spleen cells of Balb/c mice immunised with purified lactoferrin from human milk.

Catalogue No: 4L2

Specificity: Lactoferrin, human

Reactivity: MoAb 2B8 reacts in immunoblotting of whole serum proteins with a band of 77 kD. MoAb 2B8 does not cross-react with human transferrin or other serum proteins.

Recommended pairs for sandwich ELISA (capture-conjugate):

2B8-1A1
2B8-1C6

All clones are working in Western Blotting.

Mouse isotype: IgG1, kappa – all clones

Application: Detection of lactoferrin.

Purification: Purified by chromatography on protein G Sepharose. Purity is tested by electrophoresis.

Presentation: Each vial contains antibodies in PBS, pH 7.4, containing 0,1% of sodium azide as preservative. Store at + 4 °C.

Material safety note: This product is sold as an antibody preparation for research purpose only. Standard Laboratory Practices should be followed when handling this material. Contains sodium azide (0,1%) as preservative. Although the amount of sodium azide is very small appropriate care must be taken when handling this product.
