

POLYCLONAL ANTIBODY

For research use only, Not for diagnostic use

Catalog No. TIP-PTD-P03

Anti phospho TDP-43 (pS409)**BACKGROUND**

TDP-43, a heterogeneous nuclear ribonucleoprotein, was identified as a component of ubiquitin-positive and tau-negative inclusions observed in cases of frontotemporal lobar degeneration (FTLD-U) and amyotrophic lateral sclerosis (ALS). Immunohistochemical analyses using antibodies generated against phospho- and non-phosphopeptides of human TDP-43 revealed that abnormally phosphorylated full-length TDP-43 (45 kDa), C-terminal fragments (~25 kDa) and smearing substances are deposited as intracellular inclusions in affected regions of FTLD-U and ALS cases.

These antibodies are powerful tools for biochemical and immunohistochemical analyses of neurodegenerative diseases and for evaluation of cellular or animal models of TDP-43 proteinopathy.

Product type	Primary antibody
Immunogen	CMDSKS(p)SGWGM, S(p):phosphoserine 409
Raised in	Rabbit
Myeloma	-
Clone number	-
Isotype	-
Source	Serum
Purification	ammonium sulfate precipitation
Form	Liquid containing 50% glycerol and 0.05% NaN ₃ .
Concentration	-
Volume	100 µl
Label	Unlabeled
Specificity	Phospho TDP-43
Cross reactivity	Human
Storage	Store below -20°C. (below -70°C for prolonged storage). Aliquot to avoid cycles of freeze/thaw.

Application notes	<ul style="list-style-type: none">• Western blotting: 1/1000 - 1/5000• Immunohistochemistry: 1/1000 - 1/5000• ELISA: 1/1000 - 1/5000
Recommended dilutions	

Other applications have not been tested.

Optimal dilutions/concentrations should be determined by the end user.

ANTIBODY CHARACTERIZATION

Figure 1 Immunoblot analyses with pAb pS409

Perdicted molecular weight: Phosphorylated full-length TDP-43 at 45 kDa, non-phosphorylated TDP-43 at 43 kDa, - 25 kDa fragments and smearing substances in FTLD-U, ALS.

Figure 2 Immunohistochemistry of TDP-43 lesions.

PAb “pS409” recognize neuronal cytoplasmic inclusions (NCIs) and dystrophic neurites (DNs) in dentate gyrus of FTLD-U.
