

PROTAMINE SULFATE COATED ELISA PLATE

Catalog No. NM-MA-P002 NM-MA-P003

This product is a Protamine sulfate coated ELISA 96-well plate. Protamine sulfate is a highly positively charged protein that binds to negatively charged DNA. These plates are ideal for improving the accuracy and reproducibility of any plate-based assay where DNA is bound to the solid phase, such as those for DNA damage detection.

Specifications

| Catalog No. | Description | | Quantity |
|-------------|--|------------------------|-----------|
| NM-MA-P002 | PROTAMINE SULFATE COATED ELISA PLATE 96 x 5 | (96 well x 5 plates) | 5 plates |
| NM-MA-P003 | PROTAMINE SULFATE COATED ELISA PLATE 96 x 10 | (96 well x 10 plates) | 10 plates |

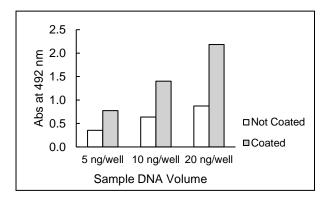

Product Information

- High DNA binding capacity DNA: native and denatured; damaged or undamaged.
- Steady binding of a small amount of DNA consistent.
- After DNA binding, plates should be used within one week.

Example of method

- 1) Add 50 uL of DNA solution (sample or control) in PBS to each well. Evaporate plates to dryness (overnight, 37 °C).
- 2) Wash each well 5 times with 150 uL of Wash Buffer.
- 3) After blocking the each well, apply primary antibody and detect appropriately.
- * These plates work well in DNA damage detection ELISAs using the following antibodies available from Cosmo Bio: Anti-CPDs (Cat No. CAC-NM-DND-001)
 - Anti-6-4PPs (Cat No. CAC-NM-DND-002)
 - Anti-DewarPPs (Cat No. CAC-NM-DND-003).
- * Optimal sample volume/concentration should be determined by user.

Results

Protamine Sulfate coating increases DNA binding capacity.

UV-irradiated DNA solution (5-20 ng) was added to wells uncoated or coated with protamine sulfate followed by incubation with anti-CPDs monoclonal antibody (Cat No. CAC-NM-DND-001). Detection signals from bound antibody in coated wells was up to 60% stronger than in un-coated wells.

Notes

- (1) Protect from the light.
- (2) Store at room temperature in the dark.
- (3) The unopened product is stable for 1 year from the shipping date.

For research use only, Not for diagnostic use.
