

# Adult Human Sebaceous Gland, Flash Frozen

Product sheet, catalog n° CTISG.1.2

## General Information

- **Organism:** Human (*Homo sapiens*)
- **Tissue:** Skin
- **Location:** Face, Abdomen, Back or others parts (see Certificate of Analysis)
- **Gender:** Male or Female (see Certificate of Analysis)
- **Age:** 18 - 99 years old (see Certificate of Analysis)
- **Phototype:** (see Certificate of Analysis)

Conservation:  
T ≤ -80 °C

Biosafety level 1

## Tissue Characteristics

- **Type of preparation:** One sebaceous gland, flash frozen after microdissection under stereomicroscope. Sebaceous glands are provided with their close microenvironment to facilitate manipulation and orientation

## Safety and Quality Control

- **Biosafety level:** 1
- **Contamination:** Use mandatory laboratory protections and handle with care tissues and cells derived from human samples to avoid any contamination of the operator.
- **Viral testing:** Negative for HIV, HBV, HCV

## Handling upon delivery and storage

- Check that the containers are intact and free of damage
- If tissue is not used immediately, place it at -80°C upon delivery

## Associated products

- CTISG.1.1: Adult Human Sebaceous Gland, Fresh, 1 Gland
- CTISD.1.2: Adult Human Skin, Full Thickness, Flash Frozen, Skin Disc 2mm Ø
- CTISG.1.3: Adult Human Sebaceous Gland, FFPE, 1 Gland
- CTISG.1.4: Adult Human Sebaceous Gland, OCT-embedded Frozen, 1 Gland

## Provisions

- Cells and tissues are intended for **research use only** and shall not be used for human trials, animal trials, or diagnostics.
- **Consent:** the original tissues have been obtained after informed consent of the patient under the provisions required by French Law.
