

# Monoclonal anti-Humira® (Adalimumab): Detection of Humira® and anti-Humira (ADA)

**Product reference: DDX5030-DDX5031-DDX5032**

## Description

Humira® (Adalimumab) is a fully human monoclonal antibody targeting TNF- $\alpha$ , used for the treatment of autoimmune diseases such as rheumatoid arthritis, ankylosis spondylitis, Crohn's disease, psoriatic arthritis or ulcerative colitis. We have generated a panel of anti-Humira® (anti-Adalimumab) monoclonal murine antibodies. These antibodies can be used to develop and calibrate Humira® (Adalimumab) and anti-Humira (anti-Adalimumab) detection assays.
