

ESTRADIOL

The Microwell Estradiol EIA is an enzyme immunoassay system for quantitative determination of 17beta Estradiol levels in ovine and related species serum. The test is intended for professional use as research tool in monitoring of conditions related to serum/plasma levels of Estradiol. The test kit has been designed for use by a trained, skilled laboratory professional only.

Results: 3 hours

Storage: 4-8°C

Procedure: 2 step incubation

Sensitivity: 5pg./ml

Shelf life: 12 months
