

Follicle Stimulating Hormone (FSH)

The FSH ELISA Test is an immunoassay designed for the quantitative determination of follicle-stimulating hormone concentrations in ovine serum. The test is designed for professional use only and should be employed by a trained/skilled professional. The assay is designed to measure circulating levels of FSH in ovine and related species.

Results: 2.5 hours

Storage: 2-8°C

Procedure: 2 step incubation

Sensitivity: 0.5ng/ml

Shelf life: 12 months
