

# PRODUCT INFORMATION Horseradish Peroxidase Labeled Lectins

Catalog Number: H-2101-5

**Description:** Pure *Triticum vulgare* lectin (WGA) from wheat germ, Horseradish

Peroxidase conjugated.

Lot Number:

Protein

5 mg purified WGA Horseradish Peroxidase / vial.

Concentration: (Based on OD 280)

Carbohydrate Specificity:

(GlcNAc-β-(1,4)-GlcNAc)<sub>1.4</sub>>β-GlcNAc>Neu5Ac

Inhibitory Carbohydrate:

GleNAc  $\beta(1,4)$  GleNAc  $\beta(1,4)$  GleNAc>GleNAc  $\beta(1,4)$  GleNAc>

GlcNAc>>sialic acid(Neu5Ac)>>GalNAc

 $\begin{tabular}{lll} \textbf{Activity:} & Less than $4\mu g/ml$ will agglutinate human type O erythrocytes. Less than $4\mu g/ml$ will agglutinate human type O erythrocytes. The second second$ 

1 μg/ml will agglutinate neuraminidase treated erythrocytes.

**Buffer:** 0.01M Phosphate - 0.15M NaCl, pH 7.2 - 7.4.

Chemical Used for Conjugation:

Horseradish Peroxidase.

**Storage:** Store lyophilized powder refrigerated at 5 - 8°C or frozen. Store liquid

frozen in aliquots. Avoid freeze-thaw cycles.

**Stability:** The liquid material is stable for at least one year when stored frozen in

aliquots.

**Caution:** Refer to the enclosed MSDS for information regarding lectins. The

aluminum seals have sharp edges and the vial itself may have cracks which can cause lacerations. Use caution when opening the vial.

**Procedure for Use:** See reverse side.

PRODUCT INFORMATION
Horseradish Peroxidase Enzyme Activity Assay

**Chemical Principle:** Peroxidase  $+ H_2O_2 \rightarrow Complex$ 

Complex +  $AH_2$  (donor)  $\rightarrow$  Peroxidase +  $H_2O$  + A (colored)

**Assay Reagents:** BUFFER: 0.01M Sodium phosphate, pH 6.0.

ENZYME: Dilute with Buffer. Acceptable dilution: 1-2 µg/ml.

DYE: 1% o-dianisidine in methanol prepared fresh daily. Store in

amber bottle or wrapped in foil.

SUBSTRATE: Prepare 0.3% H<sub>2</sub>0<sub>2</sub> solution in deionized or distilled water from stock H<sub>2</sub>0<sub>2</sub> solution Prior to use dilute to a final

concentration 0.003% in Buffer.

**Procedure:** 1. Add 0.05 ml of DYE to 6.0 ml of SUBSTRATE. Add 2.9 ml to

Reaction test tube and 2.9 ml to Control test tube.

2. At time=0, add 100μl of diluted ENZYME to Reaction tube and

100µl PBS to Control tube. Mix thoroughly.

Measure and record optical density at 460nm (OD460) every 15 seconds for 3 minutes, or take the end point reading after 3 minutes by stopping the reaction with 100 µl of concentrated

NaN<sub>3</sub>

4. Use this value to determine the rate of change in absorbance per

minute.

Enzyme Activity Calculations:

One unit of peroxidase activity is that amount of enzyme decomposing 1  $\mu$ mole of peroxide/minute at 25°C. 11.3 x 10³ cm¹ is the molar

absorbance of H2O2.

OD460 / min = OD460 / 3min - OD Control / 3minutes

3minutes

mg enzyme / ml reaction mixture =  $\frac{\text{[enzyme dilution]}}{20}$ 

30

units/ mg =  $\frac{32.7667 \text{ mm}}{11.3 \times \text{mg enzyme/ml reaction mixture}}$ 

**Caution:** Due to inhibitory sugar present in the conjugates solution, to dilute the Conjugate 50-100 times with buffer before assay.

## MATERIAL SAFETY DATA SHEET

Effective Date: March 31, 2006 Revision 4 Page 1 of 2

#### PRODUCT IDENTIFICATION

Purified proteins or biotin labeled with Horseradish Peroxidase or Alkaline

Phosphatase.

Catalog HP-02, BA-104, BA-105, BA-108, BA-109, H-1102 to H-9000, LA-1104 to LA-9000, PA-2100 to PA-2701, AA-2100 to AA-2701, HAF-001 to HAF-2354, AAF-001 Number (s):

to AAF-2354, HA-01 to HA-013, AA-01 to AA-013, HAL-1104 to HAL-4701, AAL-

1104 to AAL-4701.

Synonyms: Protein A, Avidin (egg white), Biotin, Lectins, Secondary Antibodies labeled with

Horseradish Peroxidase or Alkaline Phosphatase.

#### **EMERGENCY INFORMATION**

## **HAZARDOUS COMPONENTS**

Specific protein(s) as listed on the vial label. Solutions are at a concentration generally greater than 0.5mg protein/ ml. Biological activity of these labeled proteins will vary. Horseradish Peroxidase and Alkaline Phosphatase are both potent enzymes which may be harmful if ingested, inhaled, or allowed to absorb through the skin. Both enzymes are known to cause allergic responses in sensitive individuals.

#### **HEALTH HAZARD INFORMATION**

**EXPOSURE LIMITS:** None established. The toxicological properties of these products have not

been thoroughly investigated. Care should be taken when handling any of

these materials.

EFFECTS OF May causes localized eye, skin, or mucous membrane irritation. Some OVEREXPOSURE: sensitive individuals may develop a chronic allergic reaction with exposure.

Inhalation of powders and skin contact with liquids are the primary routes **ROUTES OF EXPOSURE:** 

of exposure. Care should be taken to avoid the formation of aerosols when

handling any of the solutions.

#### PHYSICAL CHARACTERISTICS

APPEARANCE: Powders are a light brown. Solutions will be light to dark brown. SOLUBILITY: Powders are completely soluble in many biological buffers and water. All liquids are completely miscible in water and biological buffers.

**FIRE AND EXPLOSION HAZARDS** 

EXTINGUISHING MEDIA: Water spray or CO2. SPECIAL FIRE FIGHTING

PRECAUTIONS:

NOTE:

Not considered to be a fire hazard.

None required.

Alkaline Phosphatase conjugates contain less than 0.05% sodium azide as a preservative. Azide may react with lead and copper plumbing to form explosive metal azides. Flush with copious amounts of water when disposing material in

the sink.

MSDS for Horseradish or Alkaline Phosphatase Labeled Proteins & Biotin Continued - page 2 of 2.

REACTIVITY DATA

Stable. The nature of any decomposition products are STABILITY:

not known. They are not believed to be hazardous.

HAZARDOUS POLYMERIZATION: Will NOT occur.

None known. (Lead and copper may react with INCOMPATIBILITY:

sodium azide).

SPILL / LEAK PROCEDURES

MATERIAL RELEASE / SPILL:

Avoid contact with powder or liquid. Clean up spill with a paper towel soaked in household bleach. Do not allow solutions to dry on environmental surfaces. Wash affected area with detergent after the area

has been treated with bleach.

WASTE DISPOSAL: Incinerate, autoclave, or dispose of paper waste in accordance with all

Local, State, and Federal regulations. Due to the small quantities of material involved these products are generally not considered to be environmental hazards. All of these proteins are fully biodegradable.

## **EMERGENCY FIRST AID PROCEDURES**

May be harmful if swallowed, inhaled, or allowed to absorb through the skin. Wash contacted area with water for 15 minutes. If inhaled remove to fresh air. Report exposure to the appropriate safety official. Consult a physician if irritation occurs or if there is any indication of an allergic response, such as watering eyes, sneezing, or difficulty breathing. Any eye contact should be reported to a physician immediately

SPECIAL HANDLING PRECAUTIONS

VENTILATION: No special ventilation is required but it is recommended to

handle these reagents in a fume hood when possible.

EYE PROTECTION: Required. Goggles or safety glasses with a side shield are

recommended.

RESPIRATORY PROTECTION: Recommended as a safety precaution, specifically when

working with powders. An approved respirator may be required for those individuals already known to be

sensitive to these materials.

PROTECTIVE GLOVES: Required when handling any of these materials.

## **SPECIAL PRECAUTIONS**

This material is for research and experimental application only. It is not intended for food, drug, household, agricultural, or cosmetic use. All materials should be handled only by technically qualified individuals experienced with working with potentially hazardous chemicals. The above information is correct to the best of our knowledge. The user should make independent decisions regarding completeness of the information, based on all sources available. EY Laboratories, Inc. shall not be held liable for any damage resulting from handling or contact with the above product.
