

Anti-GFP

(green fluorescent protein)

Code Number : GFP-Rb-Af2020 (rabbit)
: GFP-GP-Af1180 (guinea pig)
: GFP-Go-Af1480 (goat)

Formulation : Liquid; 200µg/ml in PBS with 0.05% NaN₃.
(affinity-purified with antigen polypeptide)

Storage : Store at 4 °C. The antibody can be stored at 4 °C. The antibody can be also aliquotted and stored at -80 °C for long-term storage. Avoid repeated freeze-thawing. Non-hazardrous. No MSDS required.

Species : rabbit / guinea pig / and goat, polyclonal

Antigen : synthetic peptides (NC_011521)

Specificity : Mouse (others not tested)

This selectively stains particular types of cells in GFP-transgenic mice, but not wild-type mice.

Applications : The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.

Research Use : For research use only, not for use in diagnostic procedures.

Remarks : Rabbit and goat GFP antibodies are very high in titer. Their application to immunohistochemistry at 0.1 ug/ml is equivalent to that at 1 ug/ml of other GFP antibodies supplied from other companies. Guinea pig antibody is also specific, but lower in titer than rabbit and goat ones.
